INTRODUCTION

One task of Lawrence Berkeley Laboratory's environmental monitoring and assessment program is to gather information on the organisms at potential Ocean Thermal Energy Conversion (OTEC) sites. This bibliography is part of a literature survey of fishes and fisheries at a proposed OTEC site in Puerto Rico, located off Punta Tuna, latitude $17^{\circ}57'N$, longitude $65^{\circ}52'W$.

The references included in this bibliography provide information on the distribution, abundance, and life history of fish species and on the commercial and sport fisheries at the proposed Puerto Rican OTEC site. Several hundred species of fish are recorded from Puerto Rico. Extensive bibliographies on many of these species are found in Fishes of the Bahamas and adjacent tropical waters (Bohlke and Chaplin, 1968), Fishes of the Western North Atlantic (7 volumes, 1948-1977), and Development of fishes of the Mid-Atlantic Bight (6 volumes, 1978). This bibliography includes references on individual species only when the fish was studied in Puerto Rican waters.

The bibliography is divided into two sections, General Works and Specialized Works. The General Works section is comprised of books which are compendiums of Western Atlantic marine fishes. The Specialized Works section includes those works which deal specifically with Puerto Rican fishes and fisheries. In each section the entries are arranged in alphabetical order by the first author's or editor's surname.

ACKNOWLEDGMENTS

I would like to acknowledge the cooperation of the Commercial Fisheries Laboratory of Puerto Rico in preparing this bibliography. Special thanks to the laboratory's director, Dr. José A. Suárez-Caabro, who supplied references on commercial fisheries in Puerto Rico, and Donald S. Erdman, who provided information and publications on Puerto Rico's sport fishery. I am grateful to Tom Dawley of the National Marine Fisheries Service in Miami for his assistance in the initial phases of the literature survey.
